Table of tolls (ETC Late night and Early morning Discount) CHUO EXPWY

*Travel distance on the Chuo Expressway for the late night and early morning discount is an exception and is deemed as 8.8km in uniform fee areas. (The only exception is the late night and early morning discount on the Chuo Expressway)

We apologize that guidance regarding late night and early morning discount tolls is sometimes not available through the toll gate display, car-mounted device display, or audio assistance. You will be billed the discounted fee.

Late night and early morning discount requirements

1. Drive through the ETC wireless communication zone at the toll gate entrance.

*There is no ETC lane at Inagi Interchange so please present your ETC card to the attendant.

2. Travel through the entrance toll booth or exit toll booth between 10pm and 6am the following day.

*In uniform fee areas (between Takaido and Hachioji) there is no exit toll booth so discounts are determined only by time of passage through the entrance toll booth.

*For continued travel from east of Kunitachi Fuchuu to west of Sagamiko Higashi, discounts are determined by the time of passage through the entrance toll booth (Hachioji main line toll booth), the exit toll booth, or in uniform fee areas, the entrance toll booth. (The only exception is the late night and early morning discount on the Chuo Expressway)

3. Travel through at least one region of the metropolitan suburbs (Takaido to Hachioji, Hachioji Junction to Kawashima)

*Because travel through points between Hachioji Interchange and west of Sagamiko does not include metropolitan suburbs, it is exempt from the late night and early morning discount.

4. Total driving distance is 100km or below.

*On the Chuo Expressway, Takaido, Choji, points between Kunitachi Fuchuu and Kofu Showa and to Kawaguchiko are included in the discount.

Legend

distance
light vehicle, etc
standard vehicle
mid-size car
oversized vehicle

Important Notes When Using ETC Time Based Discounts

1. If ETC is not usable at the entrance toll booth due to lane closure or wireless problem, please inform the attendant at the exit toll booth.
 2. Except for some roads (the Chuo Express from Hachioji Junction to Kawashima, Isewangan (Ise Bay Area) Expressway from Tokai to Tobishima and the Tokai Kanryo (Tokyo Loop) Expressway, etc.) ordinary toll roads (Hachioji Bypass, Higashi Fujigoko Expressway, etc.) are exempt from time based discounts.
 3. In uniform fee areas (between Takaido and Hachioji), the application of discounts is determined by the time of passage through the toll booth at which toll is paid.
 4. For continued use in areas west of Hachioji and uniform fee areas, the application of discounts is determined by distance and time of passage through toll booths in each area.
- *For continued travel from east of Kunitachi Fuchu to west of Sagamiko Higashi, the application of discounts on fees from Hachioji is determined by the time of passage through the Hachioji main line toll booth or the exit toll booth.
(Some exceptions apply to late night and early morning discounts on the Chuo Expressway.)
- *For continued travel from west of Sagamiko to east of Kunitachi Fuchu, the application of discounts on fees to Hachioji is determined by the time of passage through the entrance toll booth or the Hachioji main line toll booth. In uniform fee areas discounts are determined by the time of passage through the entrance toll booth on the Hachioji main line.

☆ In the ETC lane, please make sure to keep a sufficient distance between cars, reduce speed to 20km/h as you approach, and confirm that the gate is open before slowly driving through.

☆ For discount fares and details about time based discounts, please visit the Central Nippon Expressway homepage.
